

Chair Topper[®] eBrochure

Developed to assist wheelchair users who are able to transfer, the **Chair Topper** automatically folds and stores a conventional folding wheelchair inside a stylish, weathertight car-top compartment. The need to store your chair in the trunk or back seat is eliminated, allowing family and friends to enjoy the comfort of your vehicle. The universal mounting system ensures that it will fit most automobiles and light trucks. It adds only 21 1/2" in height, and the sleek plastic shell gives a finished, automotive look. A convenient hand-held control operates the folding, lifting and storing of your wheelchair. It takes only 30 seconds to complete the cycle, and the smooth operation ensures your chair is carefully handled and transported without undue wear and tear.

Car-Top Carrier for Folding Wheelchairs

Please consult with your local BraunAbility Dealer for a list of vehicles that can accept the Chair Topper.

Electromechanical, plastic-shell car-top wheelchair carrier designed to fit a wide variety of domestic and foreign vehicles. Lifting Capacity is 45 lbs. The Chair Topper utilizes a 12 volt DC reversible automotive-type motor, powered by the vehicle battery. The aluminum frame is encased in a molded plastic shell, which completely seals the wheelchair from the elements. The unit weighs 123 lbs. Two mounting systems are available for the Chair Topper: a clamp-on "roof rack" system, and a permanent pop-rivet system. Your BraunAbility Dealer will be able to determine which system will work best for your particular vehicle. Note that special considerations may be required for vehicles with luggage racks, sunroofs, hatchbacks, etc.
